

Circular Volume 6-29

By South Dakota Geological Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .T. 94 N., R. 55 W. Gravel is strewn over the hills here in much the same fashion as in the area just described. Several pits have been opened and each one has turned out to be simply a pocket of gravel. The largest are 8 by 5 feet. The materials vary from clays and fine sands to coarse gravels and small boulders. They are not well sorted in most pits so that it is not possible to excavate large amounts of any sized material without screening. A pit which was recently5 (1924) opened showed fairly uniform medium gravels. An average sample from this pit showed (Fig. 22): --Figure 23 FAVORABLE QUALITIES Passes 1 to 3 mortar test. Fairly low percentage of soft materials. UNFAVORABLE QUALITIES Low weight. USES Because of smallness of deposit, could be used as maintenance pit for any near-by gravel road. Could...

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
