A wide range of educational contexts are described in the book, including urban school settings in the U. S. , slum communities in Mumbai, India, an agricultural community in Benin, Africa, a childrens educational television program production company in the U. S. In each context, powerful examples of how science was enacted to transform ways of thinking and doing are demonstrated. Each contributor shares experiences with science, and the challenges, triumphs and lessons learned which need to be considered and addressed as part of the role of the science educator. Change, it is argued, needs to be facilitated on a variety of levels in order for learning to take place.
