Reviews

The book is fantastic and great. It is definitely basic but shocks in the 50 percent in the pdf. Its been printed in an remarkably basic way and it is just soon after i finished reading this publication in which really changed me, change the way i believe.

(Dr. Lukas Hills DDS)

RELEVANCE REGAINED

Free Press. Paperback. Book Condition: New. This item is printed on demand. Paperback. 240 pages. Building on his pathbreaking, award-winning bestseller, *Relevance Lost*, H. Thomas Johnson presents a devastating critique of the top-down hierarchical accounting systems that have dominated American corporations since the 1950s. Johnson shows exactly how managing by remote control through results-oriented accounting information has obscured and obstructed the real business objective: to reduce process variation and lead times for the purpose of obtaining and keeping satisfied customers. The failure of most American businesses to be competitive and profitable in recent years, he contends, is their reliance on management accounting information to control peoples actions and productivity. Cost-focused imperatives from on high must be replaced, Johnson asserts, with information systems that link actions with imperatives of global competition. Past practices of manipulating processes to achieve accounting cost targets dictated by top-down command and control information must be replaced by bottom-up empowerment. Self-managing work teams, according to Johnson, must own problem-solving information to reduce variation, delays, and excess in processes. Johnson prescribes the necessary changes in management principles that must replace the outdated style associated with the industrial revolution. Responsiveness to customers -- not accounting costs -- and flexibility -- reducing lead times and removing constraints -- are necessary for sustained competitive excellence and long-term profitability. Johnson discusses the radical overhauls of companies, such as General Electrics work-outs best practices program, Eastman Kodaks process control costing, and Harley-Davidsons work simplification programs, and shows how these strong commitments to new strategies maximize a companys most important assets: people and time. To be globally competitive, he claims, a companys work must be directed toward selling to customers, not just selling products. Transaction- or product-oriented companies, according to Johnson, ultimately will lose out to responsive, customer-oriented ones. This item ships from La...
